

TaskForce AgileHub

A Quick Start Guide

Written by: Lucas Wee

Introduction

Welcome to TaskForce AgileHub, a minimalist project management web app designed for Agile methodologies. With features like a product backlog, sprint views, and burnup/burndown charts, managing your Agile project has never been easier! This web application was developed as part of [FIT2101](#) Software engineering process and management.

Key Features

Product Backlog: A place to add all tasks you're planning.

Sprint View: Create sprints and drag tasks from your product backlog into your active sprint.

Burnup/Burndown Charts: Visualize the progress of each sprint through burnup and burndown charts.

Login: Use your Google account to log in for a simplified experience or register for an account.

Support: If you encounter any issues or have questions, feel free to reach out to us via email.

Roles

There are two roles available in TaskForce AgileHub:

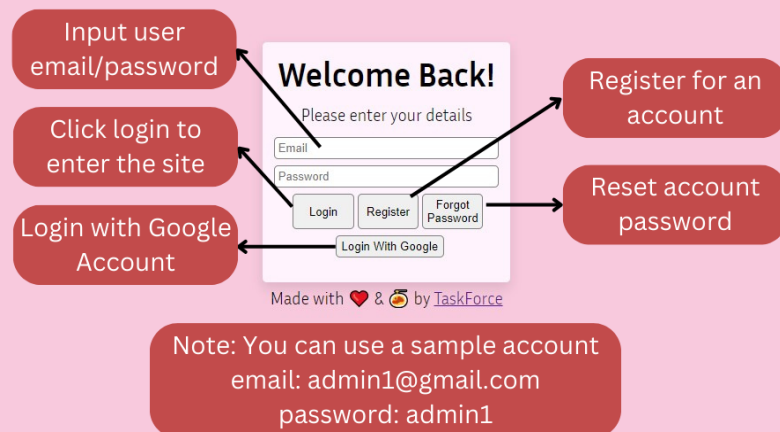

Team Member: Standard role with all functionalities required for day-to-day project management.

Admin: Identical to the team member role but with the added ability to promote other team members to admin.
